ABSTRACT

1. INTRODUCTION

2. ADDRESSAGE SECURITY

Introduce current system. Domain name registrars, DNS ...

2.1 Issues with the current system

Zooko's triangle

2.2 How to fix it

2.2.1 Certificate Pinning

2.3 DANE

2.4 Tor Hidden Services

2.5 Squaring Zooko's triangle

3. TRANSPORT SECURITY

4. THE *BODY* OF THE PAPER

5. CONCLUSIONS

//

6. ACKNOWLEDGMENTS

This section is optional; it is a location for you to acknowledge grants, funding, editing assistance and what have you. In the present case, for example, the authors would like to thank Gerald Murray of ACM for his help in codifying this *Author's Guide* and the **.cls** and **.tex** files that it describes.
